Dear members of the Validation Team

The deadline for voting on change request C00011: “Addition of a new part on environmental standardization for electrical and electronic products and systems" was
2014-10-29.
Regrettably VT members cast four positive votes only, with one negative vote and one abstention.
Although formally the change request as such has been approved, non-acceptance of individual entries was possible. A number of comments had been submitted during validation. In the light of the close voting result all comments had been carefully scrutinized by the Convenor, in order to find acceptable solutions concerning withdrawal/keeping of entries.
Please find attached a rationale for all decisions taken in the last column “Observations of the Convenor”.
I sincerely thank Erik Jacobson and Jean Schwob for their comments.

Yours sincerely
Reinhard Salffner
Convenor VT60050
